Questions

My attempt at playing around!   kinda fun but many more to explore

Rocks, Pressure and Cars

pick one ONLY!!!:

rock ▾

number of data you want to see:

10

Here is a summary of some data

```
     area           peri          shape
 Min.   : 1016   Min.   : 308.6   Min.   :0.09033
 1st Qu.: 5305   1st Qu.:1414.9   1st Qu.:0.16226
 Median : 7487   Median :2536.2   Median :0.19886
 Mean   : 7188   Mean   :2682.2   Mean   :0.21811
 3rd Qu.: 8870   3rd Qu.:3989.5   3rd Qu.:0.26267
 Max.   :12212   Max.   :4864.2   Max.   :0.46413
      perm
 Min.   :   6.30
 1st Qu.:  76.45
 Median : 130.50
 Mean   : 415.45
 3rd Qu.: 777.50
 Max.   :1300.00
```

Here is the data that you have requested for, enjoy!

area	peri	shape	perm
4990	2791.90	0.09	6.30
7002	3892.60	0.15	6.30

```r
    # Input: Selector for choosing dataset ----
    selectInput(inputId = "dataset",
                label = "pick one ONLY!!!:",
                choices = c("rock", "pressure", "CARS")),

    # Input: Numeric entry for number of obs to view ----
    numericInput(inputId = "obs",
                 label = "number of data you want to see:",
                 value = 10)
  ),

  # Main panel for displaying outputs ----
  mainPanel(
    img(src = "rstudio.png", height = 140, width = 400),
    br(),
    img(src = "rock.png", height = 200, width = 400),
    img(src = "pressure.gif", height = 200, width = 200),
    img(src = "car.gif", height = 200, width = 300),
    br(),
    br(),
    p("Here is a summary of some data", style = "font-family: 'Comic Sans MS'"),
    # Output: Verbatim text for data summary ----
    verbatimTextOutput("summary"),
    p("Here is the",
      span("data that you have requested", style = "color:blue"),
      "for, enjoy!"),
    # Output: HTML table with requested number of observations ----
    tableOutput("view")
```

i added in some photos, and i was able to add gifs too! which is a really nice touch.

i also learned that in order to put a line break, you have to insert **TWO 'br()'s** for it to work...

i also learned the div function, and also how to change the labels on each of the input areas
